12 Feb'26

→ Checked previous HWs

→ HW: Embed images into html

(1) Image from local folder

(2) Image in Base64 format (see example) — edit some of those values and see what happens

(3) Create a long binary string and convert to hexadecimal, and base 64 (use 0-9, A-Z, a-z, +/- as your 64 symbols)

Eg: $1011_2 = (8+0+2+1)_{10} = 11_{10} = B_{16}$

binary → decimal → base 16 (hexadecimal)

→ Open html file in chrome → right click → 'inspect' to see tree structure of all the tree structure of all elements.

→ HW: Complete copy tracing books (Latex) for English cursive, Telugu, Hindi

→ Github pages for our school website.

→ see links to examples in Class Diary

→ see 'Programming' Table of Contents (updated)

→ HW: (1) Create Table of Contents (TOC) as MD file for every subject in Grade 1 and Grade 2 — with links to all the files (Use your update TOC)

(2) For the 'Readme' file in ClassMaterial/
— add links & description to Sahajayoga meditation & your presentation video, ppt, etc.

(3) Take your parents' help

→ Structure of our website - GitHub pages

→ Readme.md

- describes our school, and what we do
- intro to Sahajayoga with video / ppt links
- describes how to navigate the website - Grade wise (with links to ClassDiary MD files) or Subject wise (with links to TOC for each subject)
