

14102025:

1. Science: Projects for this semester:

1. Understanding and using scientific method

1. Moon phases, tides
2. Scientifically what do we know about SY so far? Use scientific method
 1. May be collect data from Sahajayogis?
3. Examples of where scientific method doesn't work
 1. God?
 2. Homeopathy

2. Scientific papers and posters

1. How to study and understand scientific papers and posters, on topics we know or we don't know. See examples.
 1. How to write scientific articles, different sections etc.
 2. How to write scientific grants.
2. Our scientific papers, posters and grants
 1. MusicAndWaves: Compare our music poster and its sections to other posters/papers
 2. AllInClassroomTeaching: Write a scientific paper on using AI for classroom teaching. Use all our classroom examples. Make the student elaborate on these examples so he can be a genuine co-author of the article. Similar to poster sections, we will have different sections of paper.
 1. Also show examples where it doesn't work.. so you need to know the topic well enough before using AI, so u can correct any mistakes it makes. AI hallucinations.
 3. ChandassuPronunciationInCarnaticMusic: Scientific paper on Chandassu, pronunciation and Carnatic music. Give example songs with correct chandassu done by student.. give example references with wrong chandassu.. and one book with correct chandassu..

3. Our science projects:

1. Drones and Python
2. Brain computer interfaces (BCI) and Python
