More examples / options in office
software

→ HW: Hover on different buttons to
see what they do & try all those
buttons in diff. office software

→ Table files: (excel) In addition to
having data, you can also do some
analysis / computations on the data, plot
some charts etc.

HW: Try plotting diff. types of
charts on data

→ Presentation Software:

Posters have 1 very large slide with all of your presentation — Useful when presenting at a Conference (meeting) with a printed poster.

Multiple slides are useful when presenting as a talk using a computer / TV.

HW: Change your Waves & Music poster into multiple slides. Use the same text (image) ^{from the poster} but have each section in a diff. slide. (Total 7 slides)
