Toy propeller :   Simulation / Modeling

(Doing it in a computer,
  similar to how it works)
        in the real world

→ Tried creating the simulation with

    AI — didn't work

HW: Ask your parents to fix
    this code.

HW: Change parameters (initial speed
    of rotation, mass/weight of propellor,
    air properties and check
    how the flight is affected.
